Building Resilience in the Workforce, Consultants, and Families

2018 QRIS National Meeting

Holly Wilcher and Tina Jiminez, State Capacity Building Center Infant/Toddler Specialist Network
Ivory Daniels, Arkansas Department of Human Services
Kerrie Schnake, South Carolina Program for Infant/Toddler Caregivers
Introductions
Session Objectives

- Identify the concepts of risk, protective factors, and resilience.
- Discuss adverse childhood experiences in the context of resilience.
- Examine the early childhood workforce’s and families’ needs.
- Examine the impact of caregiver wellness on young children.
- Explore promising state practices for building resilience in families with young children and the early childhood workforce.
Resilience

- Write down one word that comes to mind when you think of the term *resilience*.
- Share the word with your table teammates.
Risk, Protective Factors, and Resilience
Risk factors are commonly understood to be influences that increase the likelihood of harm, or that contribute to or maintain a problem condition.

Source:
What Are Adverse Childhood Experiences?
Adverse Childhood Experiences

“Adverse childhood experiences (ACEs) are stressful or traumatic events, including abuse and neglect. They may also include household dysfunction such as witnessing domestic violence or growing up with family members who have substance use disorders.”

Families Often Experience Similar Struggles

What types of struggles do they face?
Families and the Child Care Development Fund

Sources:
Parallel Process

Resilience in infant/toddler caregivers and families, the workforce (direct and indirect), and technical assistance providers

Resilience in very young children
Protective Factors

Protective factors are defined as characteristics of the child, family, and wider environment that reduce the negative effect of adversity on child outcomes.

What Is Resilience?

Resilience Defined

The process of successfully adapting despite challenging or threatening circumstances.

Resilience: Additional Considerations

More likely exists along a continuum or spectrum that may be present to different extents across various domains of life

What Does Resilience Look Like in Young Children?
How Do We Build Resilience in Young Children?

- Building responsive relationships
- Supporting the development of foundational social-emotional skills: self-regulation, self-confidence, and empathy
- Providing positive role models
- Teaching personal wellness: exercise, nutrition, and mindfulness
- Constructing a growth mindset to solving problems
What Does Resilience Look Like in Families?
How Do We Build Resilience in Families?

- Use relationship-based practices.
- Practice cultural responsiveness when working with families.
- Tailor interventions to address sources of significant stress for families and share community resources, such as those that help with the following:
  - Housing
  - Job placement
  - Energy assistance
- Build capacity in communicating with families.
- Strengthen parenting skills.
What Does Resilience Look Like in a State System?
Resilience in Systems

Capacity of a system to adapt successfully to disturbances that threaten the livelihood, the use, or the growth of that system.

How Do We Build Resilience in a State System?

- Professional development for the workforce
- Collaborations with other family service agencies (Temporary Assistance for Needy Families; Child Welfare; etc.)
- Infant/early childhood mental health consultation
- Fatherhood initiatives
- Relationship-based competencies for consultants/coaches/caseworkers
- Reflective practice/supervision
- Better workforce conditions and compensation parity
Break
Unpacking: Questions and Answers
The Resilient Workforce
Aspects of the Early Childhood Workforce

- Nearly half of the people who watch children receive some kind of government assistance.
- The median hourly wage is $9.77.
- The work is high stress and very demanding.

Health and Wellness: A Workforce Imperative

- Research indicates young children need consistent, sensitive, caring, and stable relationships with adults in order to thrive.
- Adults who are well, physically and mentally, are likely to have an easier time engaging in such relationships than adults who are struggling with chronic illness, such as depression.
- More workplace stress is associated with more conflict in teacher-children relationships.

How Do We Build Resilience in the Workforce?

- Caregivers?

- Technical assistance professionals (consultants, specialists, coaches, mentors)
How Do We Build Resilience in the Workforce?

- Recognize stressors and provide support.
- Provide staffing patterns that build in breaks and lunches.
- Encourage staff wellness, including mindfulness practices.
- Plan professional development on topics, including the following:
  - Challenging behavior
  - Communicating with parents
  - Cultural responsiveness
  - Relationship-based practices
- Share community resources for caregivers/teachers to use as well, if needed.
- Provide professional development, reflective supervision, and/or coaching for technical assistance professionals.
What Does Resilience Look Like in Workforce?
The Good News!

We can combine professional-, program-, and system-level strategies to raise program quality and support and retain an effective workforce.
How State Systems Can Promote Resilience

- **Alaska**
  - Requires Strengthening Families approaches within its grants and contracts
  - For more information, visit [http://dhss.alaska.gov/ocs/Pages/families/goals.aspx](http://dhss.alaska.gov/ocs/Pages/families/goals.aspx)

- **Minnesota**
  - Developed higher education coursework
How State Systems Can Promote Resilience

- **17 states** integrate the *Strengthening Families Protective Factors Framework* within their quality frameworks/quality rating and improvement systems (QRISs)
- **18 states** integrate resilience concepts into early care and education workforce knowledge and competencies
- **What is your state doing?**

Taking Care of You
What Does Building Your Resilience and Taking Care of Yourself Look Like?

- Practice mindfulness
- Eat right
- Exercise
- Laugh
- Watch a movie
- Visit your happy place
- Journal
- Share your story
- Pamper yourself

- Set boundaries
- Accept help when you need it
- Recognize what is in your control and what is not
- Stay connected
- Get a good night’s sleep
- Travel
- Get out of the house
- Other ways?
